EXAMINER'S AMENDMENT

- An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
- The application has been amended as follows: On page 1, of the specification, line 4, after, "09/815,385", please insert, "now Patent No. 6,625,310".
- Please cancel claims 10-12,52-63 and 69-74.

REASONS FOR ALLOWANCE

➤ The following is an examiner's statement of reasons for allowance: The present invention is directed to a method of implementing an intelligent video surveillance system. All independent claims identify the uniquely distinct feature, "for performing spatial/temporal filtering of the regions of the frame and identifying and classifying objects using the labeled and filtered regions and analyzing behaviors of at least one of the objects". The closest prior art, McKeown et al. (USPN 6,987,451 B2), disclose method and system for detecting, monitoring, and identifying objects within an area having at least one surveillance system and one position locating system for independently detecting and monitoring objects located within an area. The surveillance system information and the position locating system information is provided to the system, and the system compares the information to determine if they are the same object and if the object is authorized to be in the area. The system also notifies the system operator if the object is not authorized to be in the area or if the object is not being detected by all the surveillance and position locating systems; while Wells (USPAP 2004/0240546 A1), discloses method for analyzing the content of a surveillance image, either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.
